

Change history

Update 1.2.2

- Proven 'NAV7' compatibility
- Open client:
 - Added RTC client support
 - You can now open DEV sessions, NAV clients and even start RTC sessions from ReVision.
- Source Control:
 - Integration with NAV 2009 R2 'Locked/LockedBy' fields
 - Compare an object with last checked in version
 - Show object history from 'Pending changes' dialog
 - More detailed error descriptions on source control module
- Compare:
 - Option to exclude Date/Time/Modified flags from exported file
 - Compare an object with last checked in version doesn't checkout object anymore when 'Live Compile' is disabled
 - Compare entire database at once instead of selecting all objects
- 'Select Object From fob', marks all objects in the object designer found in specified FOB file
- Improved performance windowhandlers
- Cancellation is also allowed for 'Synchronise All' ReVision windows are no longer locked onto NAV
- Fixed major TFS bug (only in v1.1.6): objects get unlocked when reconnection session
- Fixed icon problem in 'ProgressTracker'
- Solved problem with duplicate session names in different repositories

Update 1.1.6

- Start Client From ReVision:
 - Added Scan function to get all clients on PC
 - Work with build nr instead of NAV version
 - Open Client from traymenu as well
- Export/Import config for repository to simplify setup for multiple users
- Compare:
 - Most recent version on the right
 - More intelligent folder naming
- Redesign tray menu
- SQL trigger:
 - Error repressing
 - Preparations for future features
- Request trial from within ReVision
- Close pending window with ESC
- Problem solved with duplicate session names
- Minor bug fixes

Update 1.0.4

- New features:
 - Open Client from ReVision
 - Roll Back object
 - Merge previous version with existing version
 - Show Check Out status on designer window
 - Show Pending Changes on Object Designer Close
 - Refined SQL Lock

- Updated features
 - Checked out dialogs same manual as automatic checkout
 - Checked out warning on all attempts
 - Revision command support on sub-designer windows
 - Usability UI van "Pending objects" / checkin form
 - Compare tool: show files in fixed order
 - Correct number of "previous checked out objects"
 - R2 locked & locked by fields no longer overwritten
 - TFS module update
 - Whitespace is not a valid mandatory comment
 - Repository settings are only changed on modification (instead of every time)
 - Resolved automatic checkin / checkout bug => subdesignerwindows
 - Table information close on ESC (all tabs)
 - Minor inconsistencies fixed
 - Updated Documentation

Update 1.0.2

The first release of iFacto ReVision!

- Possibility to request for a Trial License
- Possibility to order the product
- Demo works until 15/06/2011. After this date, no demo version will be available, which means that most features will be disabled. Afterwards, you can always request a trial license to test all features.

Update 0.9.43

- Extend Licensing period => 15/05/2011
- Minor bugfixes

Update 0.9.42

- Ensuring compatibility for future NAV release(s)
- Re-engineering framework for SVN support (still in development)
- Extend Licensing period => 30/04/2011
- Minor bugfixes

Update 0.9.40

- Hotkeys available from designer windows
- Support all languages (codepage-issues)
- Check In separate sets of objects to be able to use separate CheckIn-Comments
- Table Information Tool: Quotes removed/add again when transferring to clipboard (easy searching for fields)
- Compare option: make "Live Compile" optional.
- Message "Object checked out by UserX".
- Check In comment mandatory (option)
- Improved Error Reporting
- Add versioning to revision settings files
- "Auto Check Out" option: Make the user want to choose how he wants to check out objects.
- Added usability options to have less room for faulty setup.
- Extend Licensing period => 31/03/2011
- Updated manuals

Update 0.9.39

- Updated requirements (see Installation Manual)
- Compare issue when object(s) didn't exist in second client.
- Checkout problems indicated in progress tracker.
- Table Information: Show fields "Maintain SQL Index" / "Maintain SIFT Index"
- Fixed: Checkin comment lost when checking in via "Pending Changes"
- Don't close "Pending Checkings" form on ESC
- Don't reopen the object designer when the "Pending Checkin" form is closed
- Don't open "Pending Checkings" when object designer is closed
